

Surface cleaning

Operation

Our vehicles operate the cleaning devices and supply them with water under high pressure. We use them to clear algae or moss and other deposits from terraces, paths, walls or even swimming pools in no time. We use:

- Washing beams on trucks for roads and navigable paths
- Motor-driven reels with washing beams for unnavigable surfaces
- Plate cleaners with or without suction devices for protective cleaning around the house

Technical data

Washing beams on trucks	Wash width 3.5 m, pivoted, pressure up to 150 bar
Motor-driven reels	Wash width 2.2 m, pressure up to 150 bar Distance from vehicle max. 150 m
Plate cleaners	1-3 plates in combination, with or without suction devices. Wash width up to 1.2 metres.
Hand lances	Hand cleaners up to 50 bar and various nozzle heads (rotating nozzles)

Areas of application

- Interlocking paving stone areas
- Natural stone and artificial stone slabs
- Sports ground, asphalt or natural stone coverings
- Concrete or natural stone walls
- Roofs
- Swimming pools
- Garage cleaning
- Terraces and much more

Complete equipment

- Plate cleaners with different sizes and set-ups
- Washing beams of various widths
- Suction equipment for absorbing rinsing water
- Rinsing lances and rinsing pistols for manual processing
- Couplers, hoses and tools
- Barrier material and safety material
- Suitable vehicles
